

ABSTRACT OF THE DISCLOSURE

A cosmetic pack preparation comprising (a) 5-20 wt% of polyvinyl alcohol and (b) 0.01-10 wt% of a titanium-titanium dioxide sinter is disclosed. The cosmetic pack preparation enables distinct identification of areas which the cosmetic composition was applied to or was peeled from and the skin cleaning effect, imparts a favorable sensation upon use such as ease of application and peeling, and excels in preservation stability with passage of time.
